

LEADERS IN ARCHITECTURAL & INDUSTRIAL METALWORK

ARCHITECTURAL METALWORK

Fabrication and custom fabrication of stairs, balustrades, railings, handrails, fire escapes, balconies, canopies, feature items.

INDUSTRIAL

Walkways, flooring, safety railing, access ladders, fencing, specialists in tubular and hollow section laser cut mild and stainless steel.

DOMESTIC

Signature stairs, gallery railings, handrails, spiral & curved stairs, balconies.

MATERIALS & FINISHES

Mild steel, stainless steel, aluminium, glass, shot blasting & priming, powder coating, zinc spray, galvanising, and wet-spray.

ESTIMATING & SITE SURVEYING

We insist on comprehensive on-site surveys to produce accurate real condition measurements for estimating and drawing purposes.

Our quantity surveying department produces concise unambiguous estimates based on clients' plans and specifications.

Contracts provide detailed costs, delivery dates and credit schedules to aid client budgeting and project scheduling.

DRAWING

Utilising CAD & Tekla 3-dimensional drawing packages, enables our drawing department to produce precise, reality based drawings which incorporate our site surveys as well as elements of clients' drawings.

3D walk-through scenarios can be generated for clients prior to sign off.

Scale drawings are produced for all projects to further increase accuracy in the production processes.

PRODUCTION

During fabrication processes our quality control systems are applied to all projects for consistent quality standards.

Highly skilled fitters work in one of Ireland's most technologically advanced manufacturing facilities.

Traditional, as well as Plasma & Laser cutting machines work on plate and tubular materials achieving finishes and accuracy that simply are not available from others.

QUALITY CONTROL & FITTING

All projects are tracked from receipt of an order so clients can be given timelines, progress reports and accurate delivery dates.

Projects must pass a final quality control before dispatch.

Our experienced fitting teams ensure accuracy in final fit of our products, meeting and surpassing our clients' needs and specifications.

Our fitting teams are comprised of qualified welders and fitters including stainless steel experts. They are all fully certified in safe pass & manual handling and all tools are regularly calibrated and carry up to date certification.

'REPUTATION THROUGH STANDARDS & SERVICE'
