

Signature Stairs

BY O'CARROLL'S

Signature

INCA

A modern stairs with a link to ancient Incan traditions. The Inca pattern stringers give this stairs a distinctive look and are cleverly designed to support the free standing glass balustrade. Our unique steps are seamlessly encased in a variety of solid wood finishes and their open style gives a wonderful approachable feel.

Combining the open step and glass balustrade, they create a great sense of light and space.

TURRET

The curved turret style is a classic design which makes a beautiful statement in your home. It is a real feature of a house whether within a curved stairwell as in picture or in the centre of a hallway. The spectacular vertical stainless steel balustrade give the Turret a graceful finish.

The stringers are primed and ready to take a colour of your choice.

The steps come in a variety of hardwood finishes and can be either closed or open style.

GLIDER

The Glider range – so called because of the inviting single centre spine support and wedge style steps seamlessly glide from the bottom to top.

This innovative design allows for customising designs in the risers to bring further uniqueness to your home. The glider originates from modern world design and is a beautiful feature in a contemporary style home.

The centre spin which can be circular or square and the distinctive style risers can be stainless steel or primed, ready to take a colour of your choice. The steps are available in a variety of hardwood finishes.

ILLUMINATION

The Illumination stairs incorporates 'free standing' toughened glass balustrade bedded into the hidden stringer and provides a solid unobtrusive finish to your stairs. This beautiful feature balustrade stairs can be utilised to amazing effect in an open-plan designed home.

It truly maximises the light and space in an area. The particular style of free standing glass is used often as gallery railing with stunning results.

There are a multitude of handrails available, from this floating brushed stainless steel handrail, to timber, or none at all, as the glass is self supporting.

PALLADIAN

This architecturally classic style incorporates traditional straight stringers which can be finished in stainless steel as in picture or mild steel primed, ready to take a colour of your choice.

The style goes exceptionally well all types of balustrade, particularly glass infill, with stainless or mild steel uprights.

Palladian Steps feature our unique open step design but can also be manufactured with fully closed risers.

SPIRAL

The traditional style 'Spiral' is a great architectural feature stairs in a home and offers both an option as a feature stairs or a stylish access to a more compact area, e.g. an attic conversion. Our laser technology cutting machine ensures that we deliver a stairs of the highest quality.

Our spiral stairs have a solid structural finish simply not available from modular or flat pack products. Steps can be power painted finish or hard wood or your choice from our range. Our balustrade and handrail design give the stairs stability and a classical finish.

CUSTOM SIGNATURE STAIRS

Using our years of experience, drawing expertise and technologically advanced manufacturing processes, we can offer a service to manufacture and fit a custom stairs to your individual specifications. This process is all inclusive; site surveys, 3D drawings of your design, detailed quotations, manufacture of all parts and fitted by our experienced team. *These stairs are only manufactured to a clients design, or clients are charged an hourly fee for design time prior to production.
